ELECTION OF SPECIES / RESTRICTION

Election of Species

1. This application contains claims directed to more than one **category** of species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The categories (a)-(b) of species are as follows:

(a) method of making the modified polyolefin resin:

(i) as recited in claim 15;

(ii) as recited in claim 16;

(b) resin composition with the following property:

(i) softening temperature as recited in claim 18;

(ii) Izod impact strength as recited in claim 19.

The following claim(s) are generic: 14, 17, 20-22.

Applicant is required, in reply to this action, to elect a single species in each category (a)-(b) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The common feature in these claims is a block copolymer containing propylene segments and segments comprising lactic acid, which are known in the prior art as illustrated in MATYJASZEWSKI ET AL (US 2002/0183473); therefore does not meet the requirement of a "special technical feature" as required for unity of invention.
